

Voluntary Temperature Screening

I. Policy Statement

Due to the recent COVID-19 pandemic, California Northstate University “CNU” will be implementing voluntary temperature checks using a thermal imaging system. CNU will monitor the spread of the pandemic and adjust the policy as needed.

II. Purpose

To ensure the safety and well-being of CNU campus community by providing an extra layer of safety in helping prevent community spread. Students, faculty and staff are encouraged to use the temperature check station to ensure that they are not running a temperature of 100 degrees Fahrenheit. This is a voluntary check that is encouraged.

III. Scope/Coverage

This applies to all faculty, staff, students, vendors, and visitors entering a CNU building.
